

School Administration and Services

2006 saw several changes in the School's Administration and Services staff. Gayle Samuel made the transition to retirement following almost 28 years of service to the ANU with Helen McMartin taking over as Human Resources Manager. James Irwin took over as the Manager of the School Computing Unit from Shiu Tin who retired in July. Hannelore Spanring retired from her role in Accounts at the beginning of May and was replaced by Dylan Daniel-Marsh. Mariana Ng returned to the School after a year's leave. Ms Ana Vukoja left the School to join the public service and was replaced by Ms Liudmila Mangos. The School continues to develop its staff and to provide opportunities to transfer into roles that will extend their expertise and increase their knowledge. Helen McMartin is a case in point having moved from Network Administrator into a management role in Human Resources.

The School Administration continued to provide high levels of expertise and support to those involved in the academic pursuits of the School. The Management team has considerable depth of experience and through the stability of the group continued to make a major contribution to the success of the School again during 2006. The School continued its highly acclaimed apprenticeship scheme in cooperation with other sister schools like JCSMR and RSES. However, it is recognised that, like many other areas of the University and the broader community, the aging workforce, particularly in management positions, will continue to provide challenges in the near future. The School is conscious of potential staff retirements and the consequent loss of experience and corporate knowledge and is addressing this issue through training and development as well as succession planning.
