

PUBLICATIONS

— Murray Thomas Batchelor —

Edited Volumes – Special Issues

1. M. T. Batchelor and B. I. Henry,
Pattern formation, fractals and statistical mechanics,
Physica A **233** (1996) x + pp 587-927
2. M. T. Batchelor, V. V. Bazhanov and P. A. Pearce,
The Baxter revolution in mathematical physics,
J. Stat. Phys. **102** (2001) pp 373-1081
3. M. T. Batchelor, V. V. Bazhanov and V. V. Mangazeev,
Exactly Solved Models and Beyond: a special issue in honour of R J Baxter's 75th birthday (2017),
J. Phys. A: Math. Theor.
<http://iopscience.iop.org/1751-8121/page/Exactly-Solved-Models-and-Beyond>
4. D. Braak, Q.-H. Chen, M. T. Batchelor and E. Solano,
Semi-classical and quantum Rabi models (2018),
J. Phys. A: Math. Theor.
<http://iopscience.iop.org/journal/1751-8121/page/Semi-classical-and-quantum-Rabi-models>

Edited Books

1. M. T. Batchelor and L. T. Wille, “Statistical physics on the eve of the 21st century. In honour of J. B. McGuire on the occasion of his 65th birthday”, World Scientific, Singapore (1999) ix + 523pp

Book Chapters

1. M. T. Batchelor,
Bethe Ansatz, in *Encyclopedia of Mathematical Physics*, J.-P. Francoise *et al.* (eds)
(Elsevier, Amsterdam, 2006) pp 253-257

Journal Articles

1. M. T. Batchelor and R. J. Stening,
Collisionless absorption of femtosecond laser pulses in plasmas by nonlinear forces,
Laser and Particle Beams **3** (1985) 189-196
2. M. T. Batchelor,
Sparse matrix factorization of transfer matrices,
J. Australian Math. Soc. B **28** (1987) 462-475
3. J. Oitmaa, M. T. Batchelor and M. N. Barber,
A finite lattice study of the two-dimensional biaxial next-nearest-neighbour Ising model,
J. Phys. A: Math. Gen. **20** (1987) 1507-1519
4. F. C. Alcaraz, M. N. Barber and M. T. Batchelor,
Conformal invariance and the spectrum of the XXZ chain,
Phys. Rev. Lett. **58** (1987) 771-774
[Reprinted in “Finite-size scaling”, edited by J. L. Cardy, North-Holland, Amsterdam (1988)]
5. F. C. Alcaraz, M. N. Barber and M. T. Batchelor, R. J. Baxter and G. R. W. Quispel,
Surface exponents of the XXZ , Ashkin-Teller and Potts models,
J. Phys. A: Math. Gen. **20** (1987) 6397-6409
6. C. J. Hamer, G. R. W. Quispel and M. T. Batchelor,
Conformal anomaly and surface energy for Potts and Ashkin-Teller quantum chains,
J. Phys. A: Math. Gen. **20** (1987) 5677-5693

7. M. T. Batchelor, M. N. Barber and P. A. Pearce,
Bethe-Ansatz calculations for the eight-vertex model on a finite strip,
J. Stat. Phys. **49** (1987) 1117-1163
8. F. C. Alcaraz, M. N. Barber and M. T. Batchelor,
Conformal invariance, the XXZ chain and the operator content of two-dimensional critical systems,
Ann. Phys. N.Y. **182** (1988) 280-343
9. C. J. Hamer and M. T. Batchelor,
Some finite-size amplitudes and critical exponents for Potts and Ashkin-Teller quantum chains,
J. Phys. A: Math. Gen. **21** (1988) L173-L178
10. M. T. Batchelor and H. W. J. Blöte,
Conformal anomaly and scaling dimensions of the $O(n)$ model from an exact solution on the honeycomb lattice,
Phys. Rev. Lett. **61** (1988) 138-140 [Errata **61** (1988) 1042]
11. C. J. Hamer, M. T. Batchelor and M. N. Barber,
Logarithmic corrections to finite-size scaling in the four-state Potts model,
J. Stat. Phys. **52** (1988) 679-710
12. P. Attard and M. T. Batchelor,
A mechanism for the hydration force demonstrated in a model system,
Chem. Phys. Lett. **149** (1988) 206-211
13. M. T. Batchelor and J. M. J. van Leeuwen,
Disorder solutions of lattice spin models,
Physica A 154 (1989) 365-383
14. M. T. Batchelor and H. W. J. Blöte,
Conformal invariance and the critical behaviour of the $O(n)$ model on the honeycomb lattice,
Phys. Rev. B **39** (1989) 2391-2402
15. M. T. Batchelor, B. Nienhuis and S. O. Warnaar,
Bethe-Ansatz results for a solvable $O(n)$ model on the square lattice,
Phys. Rev. Lett. **62** (1989) 2425-2428
16. M. N. Barber and M. T. Batchelor,
Spectrum of the biquadratic spin-1 antiferromagnetic chain,
Phys. Rev. B **40** (1989) 4621-4626
17. M. T. Batchelor,
Ground-state energy of some staggered spin- $\frac{1}{2}$ antiferromagnetic XXZ Heisenberg chains,
Phys. Rev. B **40** (1989) 9303-9305
18. M. T. Batchelor and C. J. Hamer,
Surface energy of integrable quantum spin chains,
J. Phys. A: Math. Gen. **23** (1990) 761-771
19. M. T. Batchelor and M. N. Barber,
Spin- s quantum chains and Temperley-Lieb algebras,
J. Phys. A: Math. Gen. **23** (1990) L15-L21
20. M. T. Batchelor, L. Mezincescu, R. I. Nepomechie and V. Rittenberg,
 q -deformation of the $O(3)$ symmetric spin-1 Heisenberg chain,
J. Phys. A: Math. Gen. **23** (1990) L141-L144
21. A. Klümper and M. T. Batchelor,
An analytic treatment of finite-size corrections in the spin-1 antiferromagnetic XXZ chain,
J. Phys. A: Math. Gen. **23** (1990) L189-L195

22. P. A. Pearce and M. T. Batchelor,
Row transfer matrix spectra of cyclic solid-on-solid models,
J. Stat. Phys. **60** (1990) 77-135
23. M. T. Batchelor and B. I. Henry,
Exact solutions for restricted walks with applications to polymers,
Phys. Lett. A **153** (1991) 35-39
24. M. T. Batchelor and A. Kuniba,
Temperley-Lieb lattice models arising from quantum groups,
J. Phys. A: Math. Gen. **24** (1991) 2599-2614
25. A. Klümper, M. T. Batchelor and P. A. Pearce,
Central charges of the 6- and 19-vertex models with twisted boundary conditions,
J. Phys. A: Math. Gen. **24** (1991) 3111-3133
26. M. T. Batchelor and B. I. Henry,
Limits to Eden growth in two and three dimensions,
Phys. Lett. A **157** (1991) 229-236
27. M. T. Batchelor and B. I. Henry,
Branching in the zero-noise limit of discrete Laplacian growth processes,
Phys. Rev. A (1992) **45** 4180-4183
28. S. O. Warnaar, M. T. Batchelor and B. Nienhuis,
Critical properties of the Izergin-Korepin and solvable $O(n)$ models and their related quantum spin chains,
J. Phys. A: Math. Gen. **25** (1992) 3077-3095
29. M. T. Batchelor and B. I. Henry,
Growth and form in the zero-noise limit of discrete Laplacian growth processes with inherent surface tension I. The square lattice,
Physica A **187** (1992) 551-574
30. M. T. Batchelor, C. R. Dun and B. I. Henry,
Growth and form in the zero-noise limit of discrete Laplacian growth processes with inherent surface tension II. The triangular lattice,
Physica A **193** (1993) 553-574
31. M. T. Batchelor and B. I. Henry,
Tip-lengths and whiskering in noise-reduced diffusion-limited aggregation,
J. Phys. A: Math. Gen. **26** (1993) 3431-3440
32. M. T. Batchelor,
Exact results for the critical behaviour of a Nienhuis $O(n)$ model on the square lattice,
J. Phys. A: Math. Gen. **26** (1993) 3733-3740
33. M. T. Batchelor and J. Suzuki,
Exact solution and surface critical behaviour of an $O(n)$ model on the honeycomb lattice,
J. Phys. A: Math. Gen. **26** (1993) L729-L735
34. M. T. Batchelor and B. I. Henry,
Diffusion-limited aggregation with Eden growth surface kinetics,
Physica A **203** (1994) 566-582
35. M. T. Batchelor,
Recurrence relations for self-avoiding walks and polygons in rectangular domains,
Phys. Lett. A **184** (1994) 467-472

36. M. T. Batchelor and C. M. Yung,
Exact transfer matrix enumeration and critical behaviour of self-avoiding walks across finite strips,
J. Phys. A: Math. Gen. **27** (1994) 4055-4068
37. M. T. Batchelor and C. M. Yung,
Comment on “Solutions of the Yang-Baxter equation for isotropic quantum spin chains”,
J. Phys. A: Math. Gen. **27** (1994) 5033-5036
38. M. T. Batchelor and C. M. Yung,
 q -deformations of quantum spin chains with exact valence-bond ground states,
Int. J. Mod. Phys. B **8** (1994) 3645-3654
39. M. T. Batchelor, J. Suzuki and C. M. Yung,
Exact results for Hamiltonian walks from the solution of the fully packed loop model on the honeycomb lattice,
Phys. Rev. Lett. **73** (1994) 2646-2649
40. M. T. Batchelor, B. I. Henry and A. P. Roberts,
Comparative study of large scale Laplacian growth patterns,
Phys. Rev. E **51** (1995) 807-810
41. C. M. Yung and M. T. Batchelor,
Integrable vertex and loop models on the square lattice with open boundaries via reflection matrices,
Nucl. Phys. B **435** (1995) 430-462
42. M. T. Batchelor, A. L. Owczarek, K. A. Seaton and C. M. Yung,
Surface critical behaviour of an $O(n)$ loop model related to two Manhattan lattice walk problems,
J. Phys. A: Math. Gen. **28** (1995) 839-852
43. C. M. Yung and M. T. Batchelor,
Diagonal K -matrices and transfer matrix eigenspectra associated with the $G_2^{(1)}$ R -matrix,
Phys. Lett. A **198** (1995) 395-402
44. M. T. Batchelor and C. M. Yung,
Exact results for the adsorption of a flexible self-avoiding polymer chain in two dimensions,
Phys. Rev. Lett. **74** (1995) 2026-2029
45. M. T. Batchelor, R. J. Baxter, M. J. O’Rourke and C. M. Yung,
Exact solution and interfacial tension of the six-vertex model with antiperiodic boundary conditions,
J. Phys. A: Math. Gen. **28** (1995) 2759-2770
46. C. M. Yung and M. T. Batchelor,
Exact solution of the spin- s XXZ chain with non-diagonal twists,
Nucl. Phys. B **446** (1995) 461-484
47. M. T. Batchelor and C. M. Yung,
Surface critical behaviour of the honeycomb $O(n)$ loop model with mixed ordinary and special boundary conditions,
J. Phys. A: Math. Gen. **28** (1995) L421-L426
48. C. M. Yung and M. T. Batchelor,
Integrable $O(n)$ model on the honeycomb lattice via reflection matrices: Surface critical behaviour,
Nucl. Phys. B **453** (1995) 552-580
49. M. T. Batchelor and Y. K. Zhou,
Surface critical phenomena and scaling in the eight-vertex model,
Phys. Rev. Lett. **76** (1996) 14-17 (Errata) 2826

50. M. T. Batchelor, V. Fridkin and Y. K. Zhou,
An Ising model in a magnetic field with a boundary,
J. Phys. A: Math. Gen. **29** (1996) L61-L67
51. Y. K. Zhou and M. T. Batchelor,
Surface critical phenomena in interaction-round-a-face models,
Nucl. Phys. B **466** (1996) 488-498
52. Y. K. Zhou and M. T. Batchelor,
Exact solution and surface critical behaviour of open cyclic SOS lattice models,
J. Phys. A: Math. Gen. **29** (1996) 1987-1996
53. M. T. Batchelor, V. Fridkin, A. Kuniba and Y. K. Zhou,
Solutions of the reflection equation for face and vertex models associated with $A_n^{(1)}, B_n^{(1)}, C_n^{(1)}, D_n^{(1)}$
and $A_n^{(2)}$,
Phys. Lett. B **376** (1996) 266-274
54. M. T. Batchelor, H. W. J. Blöte, B. Nienhuis and C. M. Yung,
Critical behaviour of the fully packed loop model on the square lattice,
J. Phys. A: Math. Gen. **29** (1996) L399-L404
55. S. U. Park, M. T. Batchelor and I. K. Oh,
Half-operatorisation of a function and physical applications,
Mod. Phys. Lett. B **10** (1996) 1151-1158
56. Y. K. Zhou and M. T. Batchelor,
Critical behaviour of the dilute $O(n)$, Izergin-Korepin and dilute A_L face models: Bulk properties,
Nucl. Phys. B **485** (1997) 646-664
57. Y. K. Zhou and M. T. Batchelor,
Spin excitations in the integrable open quantum group invariant supersymmetric t - J model,
Nucl. Phys. B **490** (1997) 576-594
58. M. T. Batchelor, V. Fridkin, A. Kuniba, K. Sakai and Y.-K. Zhou,
Free energies and critical exponents of the $A_1^{(1)}, B_n^{(1)}, C_n^{(1)}$ and $D_n^{(1)}$ face models,
J. Phys. Soc. Japan **66** (1997) 913-916
59. J. McGuire, M. T. Batchelor and B. Davies,
Linear and optimal nonlinear control of one-dimensional maps,
Phys. Lett. A **233** (1997) 361-364
60. M. T. Batchelor and J. Cardy,
Extraordinary transition in the two-dimensional $O(n)$ model,
Nucl. Phys. B **506** (1997) 553-564
61. M. T. Batchelor and K. A. Seaton,
Magnetic correlation length and universal amplitude of the lattice E_8 Ising model,
J. Phys. A: Math. Gen. **30** (1997) L479-L484
62. H. W. J. Blöte, M. T. Batchelor and B. Nienhuis,
Collapse of a polymer in two dimensions,
Physica A **251** (1998) 95-103
63. M. T. Batchelor,
Surface operator content of the A_L face models,
Physica A **251** (1998) 132-142
64. M. T. Batchelor, D. Bennett-Wood and A. L. Owczarek,
Two-dimensional polymer networks at a mixed boundary: Surface and wedge exponents,
Eur. Phys. J. B **5** (1998) 139-142

65. M. T. Batchelor and K. A. Seaton,
Correlation lengths and E_8 mass spectrum of the dilute A_3 lattice model,
Nucl. Phys. B **520** (1998) 697-745
66. M. T. Batchelor and K. A. Seaton,
Excitations in the dilute A_L lattice model: E_6 , E_7 and E_8 mass spectra,
Eur. Phys. J. B **5** (1998) 719-725
67. M. T. Batchelor, B. I. Henry and S. D. Watt,
Mean field analysis of Williams-Bjerknes type growth,
Physica A **256** (1998) 295-311
68. M. T. Batchelor, B. I. Henry and S. D. Watt,
Surface width scaling in noise reduced Eden clusters,
Phys. Rev. E **58** (1998) 4023-4026
69. M. T. Batchelor,
The $O(n)$ loop model on the 3-12 lattice,
J. Stat. Phys. **92** (1998) 1203-1208
70. M. T. Batchelor, B. I. Henry and S. D. Watt,
Continuum model for radial interface growth,
Physica A **260** (1998) 11-19
71. M. T. Batchelor and M. Maslen,
Exactly solvable quantum spin tubes and ladders,
J. Phys. A **32** (1999) L377-L380
72. M. T. Batchelor and M. Maslen,
Ground state energy and mass gap of a generalised quantum spin ladder,
J. Phys. A **33** (2000) 443-448
73. J. de Gier, M. T. Batchelor and M. Maslen,
Phase diagram of the $su(8)$ quantum spin tube,
Phys. Rev. B **61** (2000) 15196-15202
74. M. T. Batchelor, J. de Gier, J. Links and M. Maslen,
Exactly solvable quantum spin ladders associated with the orthogonal and symplectic Lie algebras,
J. Phys. A **33** (2000) L97-L101
75. J. de Gier and M. T. Batchelor,
Magnetization plateaus in a solvable 3-leg spin ladder,
Phys. Rev. B **62** (2000) R3584-R3587
76. M. T. Batchelor, R. V. Burne, B. I. Henry and S. D. Watt,
Deterministic KPZ model for stromatolite laminae,
Physica A **282** (2000) 123-136
77. K. A. Seaton and M. T. Batchelor,
The inversion relation and the dilute $A_{3,4,6}$ eigenspectrum,
J. Stat. Phys. **102** (2001) 1019-1027
78. M. T. Batchelor, J. de Gier and M. Maslen,
Exactly solvable $su(N)$ mixed spin ladders,
J. Stat. Phys. **102** (2001) 559-566
79. M. T. Batchelor, J. de Gier and B. Nienhuis,
The quantum symmetric XXZ chain at $\Delta = -\frac{1}{2}$, alternating sign matrices and plane partitions,
J. Phys. A: Math. Gen. **34** (2001) L265-L270

80. K. A. Seaton and M. T. Batchelor,
The dilute A_4 model, the E_7 mass spectrum and the tricritical Ising model,
J. Math. Phys. **43** (2002) 2636-2653
81. J. de Gier, M. T. Batchelor, B. Nienhuis and S. Mitra,
The XXZ spin chain at $\Delta = -1/2$: Bethe roots, symmetric functions, and determinants,
J. Math. Phys. **43** (2002) 4135-4146
82. M. T. Batchelor and B. I. Henry,
Exact solution for random walks on the triangular lattice with absorbing boundaries,
J. Phys. A: Math. Gen. **35** (2002) 5951-5959
83. M. T. Batchelor, J. de Gier and B. Nienhuis,
The rotor model and combinatorics,
Int. J. Mod. Phys. B **16** (2002) 1883-1890
